

Why Do People Cooperate with the Police and Criminal Courts? A Test of Procedural Justice Theory in 30 Countries

Supporting materials, Section S8 (Part 1): R code and output for the main analysis

Jonathan Jackson, Jouni Kuha, Ben Bradford, and Mike Hough

May 2025

Introduction

This document shows the R code that was used for our main analysis, and its output.

The code starts from the point where we read in the dataset (*coopdata*) in a form which is ready for the analysis. The data processing steps which were used to prepare the dataset are not included here. The variables that are used here are described in the text of the paper and supplementary Section S1.

For convenience, tables that collect the estimates of the key parameters are reported at the end of this document.

Analysis code and output
